

AI Transformation Partner for Insurance

An insurance-native AI workspace that deploys on top of existing systems - no rip and replace.

FurtherAI is the agentic workspace purpose-built for insurance. We work with carriers, MGAs, brokers, and beyond to automate high-volume workflows across underwriting, claims, policy servicing, and compliance - using fine-tuned models that understand insurance documents, systems, and decision logic. Start with one workflow, expand across many.

SELECT WORKFLOWS IN PRODUCTION

1. Submission Intake & Triage Ingest submissions from email, portals, and broker feeds. Classify, extract, validate against appetite, and route - all before an underwriter touches it. Case Study \$20B+ TIV processed · 2x UW efficiency in 3 months - Leading U.S. MGA	2. Underwriting Audit Automate file reviews across MGA portfolios. AI agents evaluate files against guidelines, flag deviations, and generate structured audit reports. Case Study 200 hrs per audit reduced to minutes · 95%+ accuracy - Top-5 U.S. carrier
3. Policy Comparison & Servicing Compare binders to policies, identify coverage gaps, validate endorsements, and surface discrepancies across layered accounts at every renewal. Case Study 95%+ comparison accuracy vs. 70-77% manual baseline - Enterprise carrier	4. Claims Intake & Processing Automate FNOL, loss run processing, and claims document triage. Extract structured data from notes, medical records, and police reports. Case Study Claims workflow automation across 10 programs - Specialty insurer, 20%+ growth

HOW IT WORKS

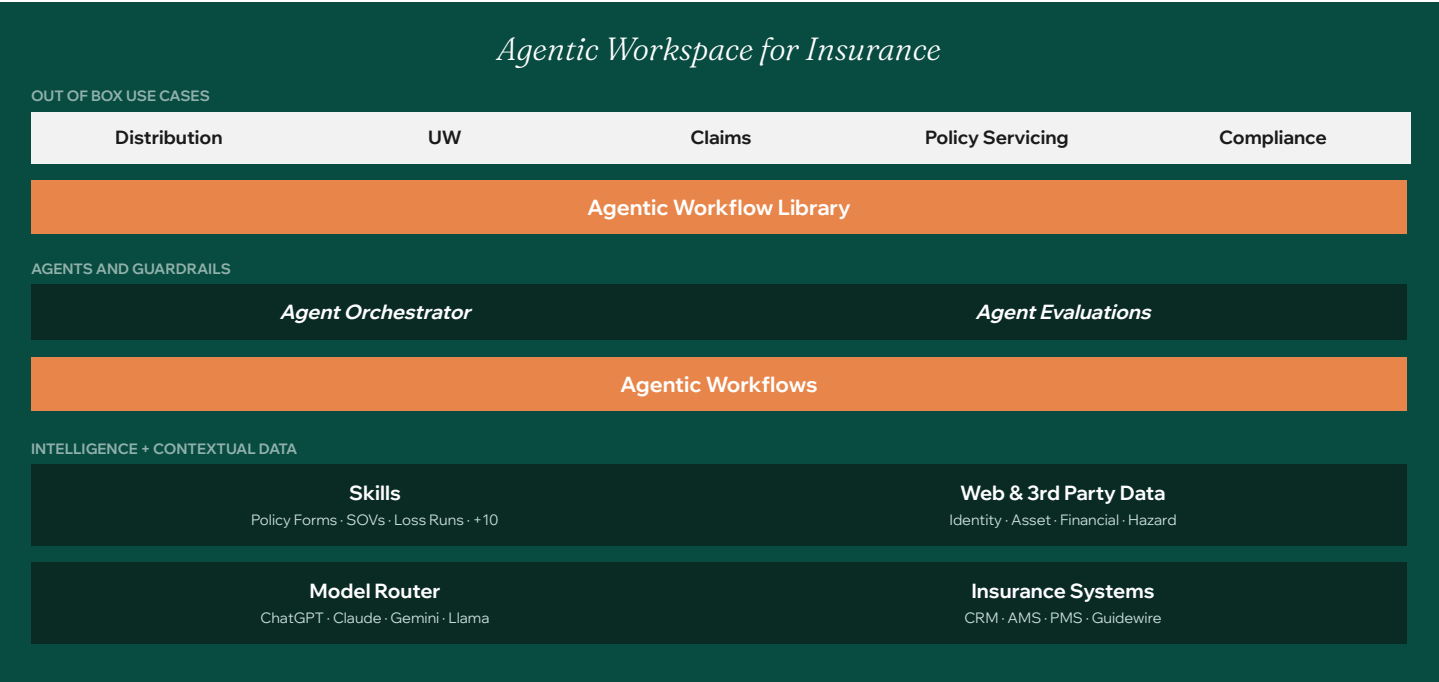

Ingest Email · Portal · API	Classify Doc type · Intent	Extract Fields · Tables	Enrich 3rd-party · Rules	Validate Appetite · Conflicts	Triage Route · Approve · Flag	Your Systems Guidewire · CRM
---------------------------------------	--------------------------------------	-----------------------------------	------------------------------------	---	---	--

SELECT ENGAGEMENTS

CLIENT PROFILE	USE CASE	IMPACT
Top U.S. MGA · \$1.5B+ premiums	Submission intake & triage	\$20B+ TIV · 2x efficiency
Top-5 U.S. carrier · 100+ MGAs	Underwriting audit	200 hrs to minutes · 95%+ accuracy
Top-10 global carrier · \$20B+ GWP	Large property operations	End-to-end workflow automation
Program carrier · 40+ programs	Submission ingestion at scale	90%+ automation rate
Specialty insurer · 10 programs	Claims workflow automation	Scaled ops through 20%+ growth

Agentic Workspace for Insurance

Purpose-built orchestration, evaluation, and governance for insurance workflows.

Evaluation Studio

Every step of every workflow is measurable, traceable, and improvable.

95%+ Extraction accuracy across document types	10x Faster eval cycles vs. manual QA	100% Decision traceability on every AI action
--	--	---

Ground Truth Comparison Side-by-side AI output vs. human-verified ground truth at every step. No black boxes.	Continuous Improvement Human corrections feed back through fine-tuning cycles. Accuracy improves with every reviewed document.
Decision Traceability Full audit trail for every AI action - data used, model run, output, and human review status.	Domain Fine-Tuning Models trained on insurance documents - ACORD, policy jackets, loss runs, SOVs.

Security & Compliance

SOC 2 Type II Annual audit. Enterprise access controls, encryption at rest and in transit.	Data Isolation Single-tenant available. Data never used to train models for other customers.	Role-Based Access Granular permissions by team and workflow. SSO and SAML support.	API-First RESTful APIs for every workflow. Embed into Guidewire, Salesforce, any system.
